HIGH OCTANE[®] Depth Charge[®] #46180
Highly palatable supplement to promote a full physical appearance

DIRECTIONS FOR USE

HIGH OCTANE[®] Heavy Weight[™] supplement is designed to be fed as a supplement to the base feeding program. Mix HIGH OCTANE[®] Heavy Weight[™] supplement into daily feed at the rates below to provide supplemental energy, essential amino acids, to help aid in palatability, and to provide essential fatty acids for skin and hair quality.

HIGH OCTANE[®] Heavy Weight[™] supplement can also be mixed with water at the rate of 8 oz per gallon of water and poured onto feed to help aid in palatability, and add energy to the total daily diet.

Remember all feed products are perishable, to help maintain freshness, store in a clean, cool, dry place.

SHOW CATTLE

2–12 oz/day

Cattle can be more sensitive to dietary changes, especially energy. Start slow at 2 oz per day and mix thoroughly along with Honor Show Chow[®] Showcattle feed of choice. Initially, cattle may be slow to consume HEAVY WEIGHT[™], but should be acclimated by day 4 to 5. Increase HEAVY WEIGHT[™] slowly, by 1 to 2 oz per day every 4 to 5 days until the desired feeding level has been achieved.

SHOW PIGS

2–16 oz/day

Begin feeding at 2 oz per day along with HONOR Show Chow[®] Showpig feed of choice. Increase slowly at 2 oz per day every other day until the desired feeding level has been achieved.

SHOW LAMBS & GOATS

2–8 oz/day

Begin feeding at 2 oz per day along with HONOR Show Chow[®] feed of choice. To help prevent digestive disturbances, increase slowly by 1 to 2 oz per day every 3 to 4 days until the desired feeding level has been achieved.
